

## E-H TEE OR MAGIC TEE

- Model 3045 E-H Tee consists of a section of waveguide with both series and shunt waveguide arms, mounted at the exact mid point of main arm, Both ends of the section of waveguide and both arms are flanged on their ends.
- These Tees are employed in balanced mixers, automatic frequency control circuits and impedance measurement circuit etc. This becomes a four terminal device where one terminal is isolated from the input terminal.
